## **DETAILED ACTION**

### **Allowable Subject Matter**

Claims, 1, 11, 12, 18, 27, and 28 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art to applicant's invention is US 6,764,770 (Paranthaman et al.) and US 2004/0157747 (Chen et al.). Paranthaman discloses a superconductor structure which comprises a Ni-alloy substrate, a first intermediate layer which is a multiple oxide which may comprise cerium, Mn, and a rare earth, a second intermediate layer comprising ceria, and a YBCO superconductor layer. Chen discloses a barrier layer which comprises ceria which may be doped with transition metals. Since the Mn in Paranthaman's first intermediate layer does not hinder forming a solid solution with cerium oxide and the rare earth oxide, it does not materially affect the basic and novel characteristics of the claimed invention. However, since Chen discloses providing a ceria layer for the purpose of thermal expansion matching and stress mitigation and Paranthaman already has an intermediate buffer layer which would provide similar characteristics to the buffer layer proposed by Chen, there exists no discovered suggestion in the prior art to dope the second intermediate layer of Paranthaman according to Chen's disclosure. Further there is no indication in the prior art that Chen's doping would provide the charge matching characteristics claimed by applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
